

Welcome to the **New Era**
of **Wearable Medical Devices**

Modular, scalable and easy-to-use platform to continuously monitor in real-time patient vital signs in hospital and at home

WINPACK AT A GLANCE

WinPack

- ✓ The most comprehensive vital signs monitoring medical device on the market
- ✓ Wearable, small and lightweight
- ✓ Plug&Play sensor modules
- ✓ Up to 30 hours battery life
- ✓ No display on board to save battery life, provide privacy and patient peace of mind

Early Evaluation Center (EEC)

- ✓ Scalable software solutions
- ✓ Data accessible on any device: PCs, Notebooks, Tablets and Smartphones
- ✓ Accurate reporting and analysis
- ✓ Customizable alerts
- ✓ Continuous real-time monitoring of up to 32 patients per ward
- ✓ Medical Record Integration – WINMR – software module to easily integrate with EMR and ADT hospital systems
- ✓ EWS – Early Warning Score – software module providing advance warning of patient clinical deterioration

VITAL SIGNS DATA CAN BE ACCESSED
ANYWHERE, AT ANY TIME
AND ON ANY DEVICE
BY THE MEDICAL STAFF

WinPack is the most comprehensive and modular monitoring system currently on the market. WinPack is lightweight and comfortable to wear for patients hosted in low-acuity settings or being remotely monitored at home. Patients can benefit from the same technology usually found in ICUs by just "wearing" it on a WinPack that merely weighs 130g.

Early Evaluation Center - EEC is an intuitive and easy-to-use software for monitoring and evaluating a patient's clinical risk, and can acquire and process source data from WinPack. EECenter can integrate additional software modules such as the EWS Module and the WINMR Module.

Win@Hospital is WinMedical's solution designed for low-acuity hospital settings where Patients can be continuously monitored in real-time. It's the customizable solution that allows the setting of individualised patient alerts. Vital signs data and alerts can be accessed anywhere, at any time and on any device by the medical staff.

Win@Home is WinMedical's solution designed for remote Patient monitoring. Patients can comfortably spend their time at home while being continuously monitored by Clinicians and Nurses. Win@Home helps reduce avoidable readmissions and improve care coordination between hospitals and community centres.

Improving clinical **efficiency** across **medical departments** and at **home** while significantly **reducing costs**

- ✔ Valuable cost reduction for healthcare providers
- ✔ Significant reduction of clinical and litigation risks
- ✔ Better Patient care

WINMEDICAL SYSTEMS BENEFITS

FOR PATIENTS

WinPack is comfortable to wear, easy to use, lightweight and allows a better and safer hospital experience

FOR HOSPITALS

WinPack is the ultimate solution for hospitals aiming at achieving prime quality of care and concurrent cost reductions

FOR CLINICIANS AND NURSES

WinPack enables continuous monitoring of all Patients whilst also significantly reducing the risks associated with medical professional liability

FOR CLINICAL ENGINEERS

WinPack is designed to leverage and easily integrate with pre-existing software platforms and IT infrastructures using Wi-Fi or Bluetooth technology
